User Guide - SmartDC™ with Credit Card Reader

Plug the connector (CHAdeMO or SAE Combo (CCS), depending on the car model) into the vehicle.

- Place your FLO card or payment card on the reader; OR
- Select the station in the FLO mobile app and tap "Start a session".

If the charging doesn't start automatically, press the flashing "START" button located at the front of the station.

Once charging is complete, press the "STOP" button, unplug the connector and replace it in its socket.

Scan the QR code that appears on the card reader screen to retrieve the charging session information or view your charging history in the FLO app.

IMPORTANT: Once charging is complete, make sure to wind the cable and store the connector in its socket.
